OUR CULTURE

What we offer :

- . Easy access to high competence.
- . Attractive pricing model.
- . Accelerate delivery time.
- . Enable new business opportunities.
- . Drive continuous improvements.

What we believe :

- . Big Ideas require hard work, continuous learning and an open mind.
- . We value the chain of respect over the chain of command.
- . The dumbest questions give birth to the smartest ideas.
- . We believe that the small details make the big differences.
- . We can encourage (human) diversity.
- . Hobbies are valuable expression of inner beauty.
- . All work and no play never works.

We act according to our company value :

- . Earn Trust.
- . Operate transparently.
- . Accomplish more together.
- . Create values for our clients.
- . Deliver excellence.

Designed for Customer Obsession :

Insights driven customer interactions

Concept-to-Market based design thinking

Transparent UAT Testing

Quick prototype changes and configuration
driven process changes

SERVICES & SOLUTIONS

WE OFFER

CUSTOM CRM DEVELOPMENT :

We are skilled in delivering powerful and fine-tuned client management software. This could be B2B or B2C enterprises running CRM solutions for 5-7M customers or middle-sized and small businesses with 10-40K clients' base.

HOSPITAL MANAGEMENT:

We have implemented a personalized care that enables providers to provide a 360 degree view of patient's health. It provides "patient relevant" alerts, treatment guidelines and diagnostic suggestions that are based on integrated health patient information from our software.

PROPERTY / RENTAL MANAGEMENT :

This allows users to record vast amount of data which includes details of prospects, clients, brokers, ongoing construction works, client interaction etc. and store it in an integrated system that could be easily accessed from any device.

ERP SYSTEM INTEGRATION :

We provide a full spectrum of ERP solutions & implementations for companies worldwide, from small businesses to enterprise-level customers. We offer a lot of related solutions, including complex implementation projects.

HUMAN RESOURCE MANAGEMENT SYSTEM

(HRMS) :

A HRMS refers to the systems and processes at the intersection between HR Management and IT. HRMS processes HR activities such as Employee Management, Payroll, Attendance, Leave Management etc.,

SCHOOL MANAGEMENT :

It is a cloud-based, multi-capability education management software primarily developed for schools, colleges and universities. It helps in managing all aspects of their organization, from admission ,fee payment,scheduling of courses, student management and curriculum.

FACILITY MANAGEMENT:

A cohesive, user-friendly, facility-specific solution. Property and building managers in charge of multiple, multi-faceted facilities need one platform that they can use to manage their assets, plan spaces, make smart purchases, schedule repairs and upkeep, and improve habitability in any number of ways.

E-COMMERCE :

We have massive experience in building complex and reliable custom e-commerce solutions and highly-scalable B2C/B2B e-commerce portals based on top-rated both commercial and open source platforms

BILLING SOFTWARE :

A value-based billing software solution is loaded with features to assist buyers in accessing product information. Add products, describe features, list their prices, and quote availability all in a single document.

SUPPLY CHAIN :

Based on a systematic approach, we deliver complex yet flexible software to help our customers increase profits, optimize the procurement management, enhance process transparency, and save time and resources.

TRAVEL & HOSPITALITY :

We have developed powerful customizable Online Transportation booking platforms for Coaches & Journeys, Sightseeing Tours and Activity Providers. The hospitality solution provides a customizable pre-templated Booking engine that allows seamless integration to the hotel websites.

WORKFLOW MANAGEMENT :

We have provided software solutions automating the businessworkflows for Project Management industry, Manufacturing, Transactional Processes, Task Scheduling Systems & Productivity Management Solutions and presenting them in a simple & easy to use UI/UX.

WEBSITE DESIGN & DEVELOPMENT :

Our team of web designers provides advanced web design solutions for enterprises, corporations, agencies and individual needs. All of them has a solid experience in delivering professional web design and development services for projects of different size and complexity level.

IOT / AI :

We are capable of designing end-to-end IoT solutions relying on the standards of device management protocols, server interfaces, gateways, and secure device-to-server and device-to-device communications.

MOBILE APP :

Mobile Application development is an integral part of today's digital world. We architect and develop a wide range of native and hybrid mobile applications. We develop Android, IOS and Windows application for Mobile, Tabs and Smart Watches.

CLOUD SUPPORT :

We manage and support cloud apps, infrastructure, and architecture so your business can get the most of your cloud-based tools. Having your infrastructure and applications hosted in the cloud removes the burden of having to manage them in-house, bringing you peace of mind.

DIGITAL MARKETING:

Our digital marketing service helps your business grow and stay visible on the internet. From generating leads and increasing your sales to driving website traffic, our digital marketing solutions can help you achieve your business goals effectively.

GRAPHIC DESIGN :

We offer a multitude of graphic design services or more. You know your business and website are too much depend on what you show. Logo designing, Package design, Brochure design, Flyer design, Newsletter designing and Custom business card designs

HARDWARE & SOFTWARE SUPPORT :

Software & Hardware support is vital to a business's IT. It works to ensure smooth, trouble-free operations. Software & hardware can fail, requiring troubleshooting & repairs. We offer a variety of software & hardware support services to keep your systems running at their best.
